Dear Caprian / Mulligan Concept trained Physiotherapist,

It is a pleasure to announce that the examination for Certified Mulligan Practitioner (CMP) will be held in Mumbai from 26th Nov. 2010 for the Physiotherapists trained in Mulligan Concept from India & other Countries. Only those who have completed the DPT / BPT from a reputed, recognized institution and all three modules of Mulligan course from a certified MCTA teacher are eligible to apply for this CMP examination. Clinical Experience with Mulligan Concept is highly recommended. It is the expectation of the Mulligan Concept Teachers Association (MCTA) that individuals who have taken the recommended course and have clinical experience with the Mulligan Concept should be successful with the examination process. The examination consists of multi-level testing with written, viva & practical components designed to assess the clinical knowledge and skills developed by the practitioner throughout the course curriculum.

The CMP Examination will be taken by two examiners (internal & external examiner). Internal examiner will be Deepak Kumar from India while external examiner will be some other certified Mulligan Concept Teacher from US / Europe / Australia or New Zealand.

The purpose of conducting CMP examination and recognizing such clinicians is two fold: As a referral source for clinicians and for the patients seeking treatment from physical therapists who have achieved a recognized level of competence in the Mulligan Concept. The process of CMP credentialing will assist clinicians who are interested in having their knowledge based skills and competence in the Mulligan Concept evaluated, by providing a peer review/examination process. It is anticipated that the individuals with CMP credentials will have improved treatment outcomes.

Clinicians, who have attended the course, but not practiced it and have not used Brian Mulligan 4th OR 5th or 6th edn. text as a clinical resource and guide for developing further understanding and skills in the Mulligan Concept, may find the CMP credentialing exam very challenging.

It is also important to note that individuals who qualify the CMP exam are NOT entitled to teach the Mulligan Concept.

Upon successful completion of the examination process these clinicians will be recognized as Certified Mulligan Practitioner – CMP (a reputed qualification as Manual Therapists) and their names will be listed on the official website of Mulligan concept www.bmulligan.com and will be referred / recommended to clinicians and the general public seeking treatment from physical therapists who have achieved a recognized level of competence in the Mulligan Concept.

Please find following details for applying for the CMP examination.
